**DETAILED ACTION**

1. Claims 1-20 are pending, wherein claims 1-20 are drawn to thermosetting powder coating.

***Claim Analysis***

2. Summary of Claim 1;

A thermosetting powder coating composition	
a	coating forming component which can crosslink and harden by ester exchange reaction between carboxylic ester group and hydroxyl group
b	Ester exchange reaction catalyst, wherein ester exchange reaction catalyst constituted from organic sulfonate derived from a carboxylic amide and an organic sulfonic acid having fluorine atoms

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Shoichiro et al. (JP 09-059543).

Shoichiro et al. discloses a resin composition comprising a copolymer obtained by copolymerizing tert-butyl methacrylate and/or tert-butyl acrylate with a hydroxyl group-containing vinyl monomer in the presence of a transesterification catalyst.

It is noted that Shoichiro et al. is silent on the transtesterfication catalyst made by a specific process. However, the patentability of a product is a seperate consideration fro that of the process by which it is made. *In re Thrope* 777 F. 2d 695, 227 USPQ 964, 966 (Fed. Cir. 1985).

Claims 3-20 are rejected under this premise.

### ***Conclusion***
